

TOTAL COVERAGE

Organizations, Societies or Universities can help their researchers to publish their papers in the PAGEPress Open Journals (see the list below) and totally cover the cost of Open Access publishing.

They can pre-purchase an X number of “Article Processing Charges” and make them available for the publishing activities of their researchers. So when a paper is accepted and ready to be published in one of our journals, the APC for the journal in question will be deducted from the pre-paid “credit” already bought by the Institution in their account.

Up to 5 APC (pre-paid) we will apply a discount of 10%
Up to 10 APC (pre-paid) we will apply a discount of 15%
Up to 20 APC (pre-paid) we will apply a discount of 20%

i.e. A society of clinical oncology can decide to purchase 5 APC for Rare Tumors. It will pay in advance 2000 EUR minus a discount of 10% = 1800 EUR. When an article by one of its researchers is ready to be published in Rare Tumors, we deduct from your account the cost of the Rare Tumors APC minus a discount of 10% (400 EUR – 10% = 360) (1800/360=5)

This agreement enables institutions to contribute to their research activities while saving money at the same time.
