Biomedical Science and Engineering is an Open Access, online-only, peer-reviewed journal focusing on the publication of original manuscripts and authoritative review and opinion papers dealing with the application of engineering and technology principles and a wide range of physical, biological and chemical sciences for the design of biomaterials, scaffolds, drug delivery vehicles and biomedical sensors for regenerative medicine applications.

Biomedical Science and Engineering is relevant to areas such as tissue engineering, nanomedicine, in vitro tissue modeling, cancer diagnosis and therapy, implantable devices, drug delivery, bionanotechnology and diagnostic systems.

Our authors benefit from

- Higher and faster visibility
- Rigorous and constructive peer review
- Quick review and publication times
- No publishing cost

NOW welcoming submission

The journal welcomes original manuscripts and authoritative review and opinion papers dealing with the application of engineering and technology principles and a wide range of physical, biological and chemical sciences for the design of biomaterials, scaffolds, drug delivery vehicles and biomedical sensors for regenerative medicine applications.

Main topics include but are not limited to: • Design of biomaterials; • Design of scaffolds; • Drug-delivery systems; • *In vitro* models of tissues/organs; • Sensor devices
